WORK EXPERIENCE

Multiapoyo - Casa de empeño

Frontend Developer

April 2024 - Present

- Developed the core frontend architecture for a new B2B SaaS product using React, TypeScript, and Styled Components, establishing a foundation for long-term maintainability and feature scalability.
- Integrated RESTful APIs and optimized state management with Redux Toolkit, enabling real-time data syncing for multi-tenant dashboards and enhancing scalability in a subscription-based SaaS environment.
- Contributed to a 50% drop in bug reports by actively participating in code reviews and enforcing clean, maintainable code standards.
- Collaborated closely with designers, backend developers, and product managers to translate business needs into intuitive and scalable UI solutions.

Grupo Chulavista

Fullstack Developer

August 2022 - April 2024

- Developed and deployed personalized digital wedding invitation platforms using the MERN stack (MongoDB, Express.js, React.js, Node.js), delivering dynamic and scalable solutions.
- Designed and implemented high-converting landing pages with React.js, achieving a 30% increase in conversion rates, driving significant customer acquisition and business growth.
- Optimized four company websites using Elementor Pro and WordPress, improving load speeds by leveraging performance best practices, resulting in a 40% reduction in page load time.
- Utilized heatmaps and Google Analytics to analyze user behavior, implementing data-driven UI/UX improvements that increased user interaction rates by 25%.

EDUCATION

Computer System Engineer

August 2018 - December 2022

Universidad del Valle de México

High School

August 2014 - June 2017

Instituto Simón Bolívar
